

## Final project proposal

Preview: every year we are hearing in the news that was not enough rainfall -

# Does Israel really drying?

By: Raz Bahat and Eran Peled

---

---

## Propose

The research propose is to study a large datasets and conclude if the country really drying because of decrease in rain precipitation and population grown or this generation is just an overuse spoilt human being that counting on supreme water technology compare to our modest ancestor.

## Datasets

- Precipitation and snow from the homework assignment.
- Israel meteorological service.
- The Water Authority Council.
